Installation Instructions

VoiceMaster™

VM110 Digital voice messaging unit

Supply:	12/24V DC
Message duration:	Maximum of 15 seconds (including any tones)
Current consumption:	Quiescent: 5mA During message < 1A average
Output:	VM110 - up to 110db (message dependent)
Connections:	Black - Negative supply Red - Positive White - Negative trigger
Warranty:	12 months - Warranty No. shown inside unit
Weather resistance:	Electronics encapsulated in resin

Connecting your VM110:

Connect fused supply and apply a negative voltage to the white wire to trigger the VoiceMaster. The message will sound once every time the trigger is applied

Please Note:

VoiceMaster™ messaging units can be supplied with your own custom message. Standard messages can be up to 17 seconds long (depending on model supplied) and can include tones for attention. Typical application messages include fire, security, attention, safety, alert and courtesy.

To order a VoiceMaster™ with your own personalised message, please fax your message (no longer than 17 seconds including tones) together with your order number, the quantity required with the personalised message and whether the message is to single or continuous. A surcharge of £10 for the first personalised VoiceMaster™ will be applied and a charge of £2.50 will be charged for all subsequent VoiceMaster™ orders with the same personalised message. All prices quoted are exclusive of VAT in accordance with our standard terms and conditions of sale.
